EDUCATION

SOUTHERN LUZON STATE UNIVERSITY

Bachelor of Science in Computer Engineering

Lucban, Quezon

2022 - 2026

SUMMARY

I am a computer engineering graduate who has a keen interest in technology. At present, cultivating technical and troubleshooting skills by working in various areas of technology. I am keen to learn, add value, and acquire professional exposure with regard to real-life projects. Dedicated to flexibility, enhancement and long-lasting growth in the area of technology.

RELEVANT EXPERIENCE

IBUILD.PH WEB SERVICES AND SOLUTIONS

Web Developer Intern

Marikina, Metro Manila

June – August 2025

- Managed and updated website content using Drupal, including creating, editing, and publishing web pages, announcements, and articles while ensuring accuracy and proper formatting.
- Assisted in website maintenance by troubleshooting minor technical issues, checking page functionality, and ensuring that website content, links, and media were properly displayed and accessible.
- Uploaded, organized, and maintained digital assets such as images, documents, and multimedia files, while following company guidelines for content structure and file management.
- Collaborated with team members using Trello for project management on website improvement tasks, including content updates, layout adjustments, and user interface enhancements to improve overall user experience.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C++

Frontend Development: HTML, CSS, Drupal

Backend Development: Drupal, MySQL

Tools & Platforms: Linux, Visual Studio Code, Eclipse, Google Colab, SEO

PROJECTS

EXPECULIART WEBSITE

Frontend Project

- Designed and developed a front-end website for the “Expeculiart” project using HTML, CSS, and JavaScript, focusing on clean layout and visual presentation.
- Implemented structured page layouts, including navigation menus, sections, and content organization for improved user experience.
- Tested and refined page elements to ensure consistency, readability, and overall usability of the website interface.

MUD CRAB GENDER CLASSIFICATION AND COUNTING SYSTEM

Undergraduate Thesis

- Developed an image recognition-based system that automatically identifies and counts mud crabs by gender using AI and computer vision.
- Integrated real-time detection, automated counting, and graphical user interface functionality.
- Technologies used: Python, OpenCV, YOLO, Tkinter.
