EDUCATION

Southern Luzon State University

Bachelor of Science in Computer Engineering

Lucban Quezon

2022 - 2026

EXPERIENCE

Web Developer Intern

IBUILD.PH WEB SERVICES AND SOLUTIONS

June - August 2025

Marikina, Metro Manila

- Managed and updated website content using Drupal, including creating, editing, and publishing web pages, announcements, and articles while ensuring accuracy and proper formatting.
- Assisted in website maintenance by troubleshooting minor technical issues, checking page functionality, and ensuring that website content, links, and media were properly displayed and accessible.
- Uploaded, organized, and maintained digital assets such as images, documents, and multimedia files, while following company guidelines for content structure and file management.
- Collaborated with team members using Trello for project management on website improvement tasks, including content updates, layout adjustments, and user interface enhancements to improve overall user experience.

PROJECTS

KCMACAPAYAD: PROFESSIONAL WEB PORTFOLIO | [GitHub Link](#)

June 2026 – Present

- Designed and developed a responsive personal portfolio website to showcase academic background, technical skills, and projects.
- Built a mobile-friendly and responsive layout to ensure compatibility across desktop, tablet, and mobile devices.
- Utilized Git and GitHub for version control, project management, and deployment workflow.
- Deployed and maintained the website using Vercel, enabling continuous deployment and easy updates.

FORMA: WEB LAYOUT PROJECT | [GitHub Link](#)

June 2026

- Developed FORMA, a responsive one-page website using HTML, CSS, and JavaScript, translating a Figma AI-generated mockup into code to practice front-end fundamentals and modern layout techniques.
- Implemented responsive layouts using CSS Grid and Flexbox, creating a clean and minimalist user interface with interactive navigation.
- Utilized Git for version control and deployed the project on Vercel, gaining experience with real-world development workflows and hosting.

EXPECULIART | [GitHub Link](#)

July 2026

- Developed a responsive front-end website for an art business using HTML and CSS, featuring artwork, sticker, and custom tote bag showcases.
- Rebuilt a previous college project from scratch with improved responsive layouts, cleaner code structure, and a more polished user interface.
- Used Git for version control and deployed the project on Vercel for online hosting.
