EXPERIENCE

Web Developer Intern

June - August 2025

IBUILD.PH WEB SERVICES AND SOLUTIONS

Marikina, Metro Manila

- Managed website content in Drupal CMS by creating, editing, and publishing pages, announcements, and articles, ensuring accuracy and consistent formatting across the live site.
- Diagnosed and resolved website functionality issues, including broken links and display errors, to keep pages accessible and fully operational for site visitors.
- Collaborated with the team via Trello on layout and UI improvement tasks, contributing to a more polished and user-friendly website experience.

PROJECTS

KCMACAPAYAD: PROFESSIONAL WEB PORTFOLIO | [GitHub Link](#) | [Live Site](#)

June 2026 – Present

- Designed and built a 3-page responsive portfolio site (Home, Background, Projects) from scratch using HTML, CSS, and JavaScript, making all layout and structural decisions independently.
- Implemented on-page SEO fundamentals, including meta descriptions, Open Graph, and Twitter Card tags across all pages, improving link previews and search-engine discoverability.
- Deployed the site via Git and Vercel with continuous deployment, enabling live, always-current hosting of academic background, skills, and project work for recruiters.
- Improved off-page and technical SEO by securing a dofollow backlink via a merged GitHub pull request, publishing a nofollow-linked dev.to article, and verifying the site through Google Search Console for confirmed search indexing.

FORMA: WEB LAYOUT PROJECT | [GitHub Link](#) | [Live Site](#)

June 2026

- Translated a Figma AI-generated mockup into a responsive one-page website using HTML, CSS, and JavaScript, strengthening front-end fundamentals and layout technique.
- Implemented responsive layouts with CSS Grid and Flexbox, producing a clean, minimalist interface with interactive navigation across screen sizes.
- Deployed the project via Git and Vercel, gaining hands-on experience with real-world development and hosting workflows.

EXPECULIART | [GitHub Link](#) | [Live Site](#)

July 2026

- Rebuilt a prior college project from scratch as a responsive front-end site for an art business, using HTML and CSS to showcase artwork, stickers, and custom tote bags.
- Restructured the codebase with cleaner organization and improved responsive layouts, resulting in a more polished and maintainable user interface.
- Deployed the project via Git and Vercel, delivering a live, publicly accessible site for online hosting.
